

With over 700 beekeepers in our family, we are proud to continue a legacy that began 70 years ago with two beekeeping brothers. In 1953 these brothers, Tim & Bert Smith, set the foundations for Capilano with strong values to support Australian beekeepers - values that still drive us today.

Australian owned and operated, with sites located in Richlands, QLD, Maryborough, VIC, and Bayswater, WA, our team are passionately focussed on packing and marketing quality Australian honey.

Over the decades, our company has maintained a strong commitment to innovation and quality in bee products. We are equally dedicated to protecting and fostering the growth of the Australian apiculture industry, our Aussie bee population and the environment.

Our mission is to support Australian beekeeping families and share our passion and knowledge of honey, bees and health & wellness to consumers all over the world through the Capilano & Wescobee brands.
